

ICF Secures Multiple Utility Demand-side Energy Management Contracts

March 17, 2025

Company Will Leverage Advanced Analytics and AI to Optimize Energy Savings

RESTON, Va., March 17, 2025 /PRNewswire/ -- A large Southern electric utility has awarded global consulting and digital services provider ICF (NASDAQ:ICFI) two recompetete contracts valued at over \$35 million to deliver its residential and commercial [demand-side management](#) (DSM) programs.

ICF will continue delivering leading-edge DSM programs for the utility, driven by the company's proprietary cloud-based, AI-powered customer analytics platform. This solution supports every stage of the utility's DSM programs, from design to engagement, implementation and evaluation. ICF's platform also uses advanced analytics to track performance in real time, maximize energy savings and help the utility deliver reliable, affordable power as demand grows.

ICF will also continue to bring innovative ideas and customized solutions to the utility, having launched over 25 innovation pilots to date that enhance program delivery and improve the customer experience.

"Now more than ever, utilities are confronted with the urgent task of delivering reliable and affordable power while addressing rising energy demands," said Anne Choate, ICF executive vice president for energy, environment and infrastructure. "With ICF's extensive energy experience, cutting-edge technology solutions and proven track record of delivering numerous award-winning demand-side energy programs, we're helping utility clients facilitate the rapid and effective program optimization needed to meet these challenges head on."

ICF partners with the nation's top utilities and developers, along with nearly every U.S. federal agency, state energy office and energy non-governmental organization, providing end-to-end offerings across the energy value chain—from strategy to planning and analysis to implementation and customer engagement. The company currently delivers hundreds of active demand-side management and electrification programs across North America and is one of the largest electrification implementers in the country.
