

ICF International Awarded FEMA Task Order Valued Up to \$26 Million to Implement Radiological Emergency Preparedness Program

July 10, 2007

Program Critical to Protection of Public Health and Safety in
Communities Surrounding Nuclear Generating Facilities

FAIRFAX, Va.--(BUSINESS WIRE)--July 10, 2007--ICF International (NASDAQ:ICFI) today announced it won a recompete task order for up to US\$26 million from the Federal Emergency Management Agency (FEMA) to implement the agency's Radiological Emergency Preparedness (REP) program. The program, established in 1980 following the 1979 accident at Three Mile Island Nuclear Generating Station, is designed to ensure the safety of residents living near nuclear power plants.

The task order has been partially funded for \$5.1 million. It is for 10 months, with three one-year options, and was awarded through the company's subsidiary, ICF Incorporated, LLC.

ICF International is the only firm that FEMA has chosen to support its REP program since the contract was first opened to the private sector in 2000.

"ICF places tremendous value in FEMA's renewed vote of confidence and believes the daily working relationships and trust built during the last six years have proven invaluable to carrying out the critical mission of protecting these communities in the event of a disaster," said Anita Tallarico, a senior vice president and emergency management expert at ICF International. "Backed by the expertise of our people, the breadth of our knowledge, and state-of-the-art technology, ICF is able to address the challenges inherent in programs like this while continually improving processes and maintaining high-quality support of our client."

Under the contract, ICF brings 145 qualified evaluators to perform in-depth assessments of state and local emergency preparedness surrounding U.S. nuclear power plants at FEMA's full-scale exercises. Additionally, ICF experts develop training modules used by FEMA inspectors, build web tools to enhance the agency's technological capabilities, and develop communications strategies to inform communities about emergency preparedness. ICF will also work with the agency to advise on revisions and updates to current policy and regulatory documents to reflect the many advances in the REP Program during the past 25 years. New to the task order is analyzing the safety of communities living near proposed new reactors.

ICF International (NASDAQ:ICFI) partners with government and commercial clients to deliver consulting services and technology solutions in the energy, climate change, environment, transportation, social programs, health, defense, and emergency management markets. The firm combines passion for its work with industry expertise and innovative analytics to produce compelling results throughout the entire program life cycle, from analysis and design through implementation and improvement. Since 1969, ICF has been serving government at all levels, major corporations, and multilateral institutions. More than 2,500 employees serve these clients worldwide. ICF's Web site is www.icfi.com.

This document may contain "forward-looking statements" as that term is defined in the Private Securities Litigation Reform Act of 1995--that is, statements related to future--not past--events, plans, and prospects. These statements involve known and unknown risks, uncertainties, and other factors that may cause our actual results, levels of activity, performance, or achievements to be materially different from any future results, levels of activity, performance, or achievements expressed or implied by such forward-looking statements. In some cases, you can identify these statements by forward-looking words such as "guidance," "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "potential," "seek," "should," "will," "would," or similar words. You should read statements that contain these words carefully because they discuss our future expectations, contain projections of our future results of operations or of our financial position, or state other forward-looking information, and are subject to factors that could cause actual results to differ materially from those anticipated. For ICF, particular uncertainties that could adversely or positively affect the Company's future results include but are not limited to: risks related to the government contracting industry, including the timely approval of government budgets, changes in client spending priorities, and the results of government audits and investigations; risks related to our business, including our dependence on contracts with U.S. Federal Government agencies and departments and the State of Louisiana; continued good relations with these and other customers; success in competitive bidding on recompete and new contracts; performance by ICF and its subcontractors under our contract with the State of Louisiana, Office of Community Development, including but not limited to the risks of failure to achieve certain levels of program activities, termination, or material modification of the contract, and political uncertainties relating to The Road Home program; uncertainties as to whether revenues corresponding to the Company's contract backlog will actually be received; the future of the energy sector of the global economy; our ability to attract and retain management and staff; strategic actions, including attempts to expand our service offerings and client base, the ability to make acquisitions, and the performance and future integration of acquired businesses; risks associated with operations outside the United States, including but not limited to international, regional, and national economic conditions, including the effects of terrorist activities, war, and currency fluctuations; and other risks and uncertainties disclosed in the Company's filings with the Securities and Exchange Commission. These uncertainties may cause ICF's actual future results to be materially different than those expressed in the Company's forward-looking statements. ICF does not undertake to update its forward-looking statements.
